World Day for Safety and Health at Work is celebrated every year on 28 April, a key date promoted by the International Labour Organization to raise awareness of the importance of preventing occupational accidents and diseases.

In 2025, the campaign revolves around the theme: 'Revolutionising health and safety: the role of AI and digitalisation at work'. A theme that brings to the table the new challenges and opportunities that emerging technologies bring to the field of occupational health and safety.

Why is this approach important?

Digitalisation and artificial intelligence (AI) are changing the way we work. From intelligent surveillance systems to task automation platforms, these technologies can improve occupational risk prevention, but they also raise concerns. The ILO promotes a responsible approach to ensure that this technological transition is safe, equitable and people-centred.

Visor Fall Arrest Nets joins the commitment

At Visornets, specialists in safety nets for construction, we want to celebrate this milestone by sharing four key articles from our blog. These articles are designed to help companies, safety technicians, and industry workers improve safety on construction sites.

1. Falls from heights: preventive measures
One of the most frequent risks on construction sites. In this article we tell you which systems to use in each phase of the work to minimise the danger. Read it here.

2. How to avoid falling objects at construction sites?
Objects falling from heights cause many accidents. Here we explain how to prevent them with practical and effective measures. Read it here.

3. First aid in case of accidents
Acting quickly can make all the difference. This post includes recommendations on how to assist an injured worker until medical assistance arrives. Read it here.

4. Questions and answers about working at height
Everything you need to know about the risks, consequences and protection tools when working at height or on high levels. Read it here.

In memory of those who are no longer with us

This day is also an opportunity to remember and honour those who have lost their lives or health at work. That is why we reinforce our daily commitment to creating safer, more humane and future-proof working environments.Do you have doubts about which system is the most suitable for your project?

 Contact our technical team and we will advise you without obligation.
