

This Wednesday the 23rd and Thursday the 24th **VisorNets** was present at the II Edition of the Mostra d'innovació en Prenveció in the construction sector – MosIP 2024, which was organized by the Construction Labor Foundation and which took place in the center of Bétera.

This fair takes place twice a year and brings together companies, professionals and high school and university students. It also has the presence of INVASSAT.

What did MosIP 2024 consist of?

Manufacturers exhibited their stands with occupational safety products and solutions. The

groups arrived in shifts (two in the morning and one in the afternoon organized by schedule) to visit the different stands.

Once there, the manufacturers explained their security systems, products or solutions to the listeners, who could also test the products. This way of organizing visits to the stands was very good since it allowed everyone to be visited and heard in the same way, and for the groups to be organized.

Throughout the day there were a series of workshops and talks that visitors could attend. But they could also take advantage of those moments to approach those stands that had sparked the greatest interest and ask for more information.

There was no shortage of food As in any good event/fair, attendees were able to enjoy breakfast (with all kinds of pastries, coffee, water, etc.) and a cocktail at lunch time (with a wide variety of delicious appetizers and of course with a variety of desserts to finish).

List of exhibitors:

- ATT Prometal
- GA Consultores
- Visor Nets
- Panter
- Siteprotec
- Centurion
- IP Technology
- Astillo
- Tecnitop

Two very complete days in which both exhibitors and visitors were able to enjoy the latest in safety, prevention and construction. Because #youarewhatyoubuild
