

Normally the **safety nets manufactured in Visornets** comes regularly in standarized sizes by market or costumer , always square or rectangle sizes.

But what it happens if a costumer need a specific safety net for a particular solution where the net is not square or rectangle?

Well, no problem at all at Visornets, we do have a fully experienced engineer department and experienced netmakers as well, so we can make it real any drawing you need for your Project as so special as it wil be.

---

Let's see one of the latest special Project: A customer came to us asking if is posible to make a safety net with a very speacial shape, because they have to install it for protecting the fall people and debris in manteniencia labours inside a big rated hotel. The solution with netting had to protect the worker and the hotel clients because the net will have to be just up in the lobby.

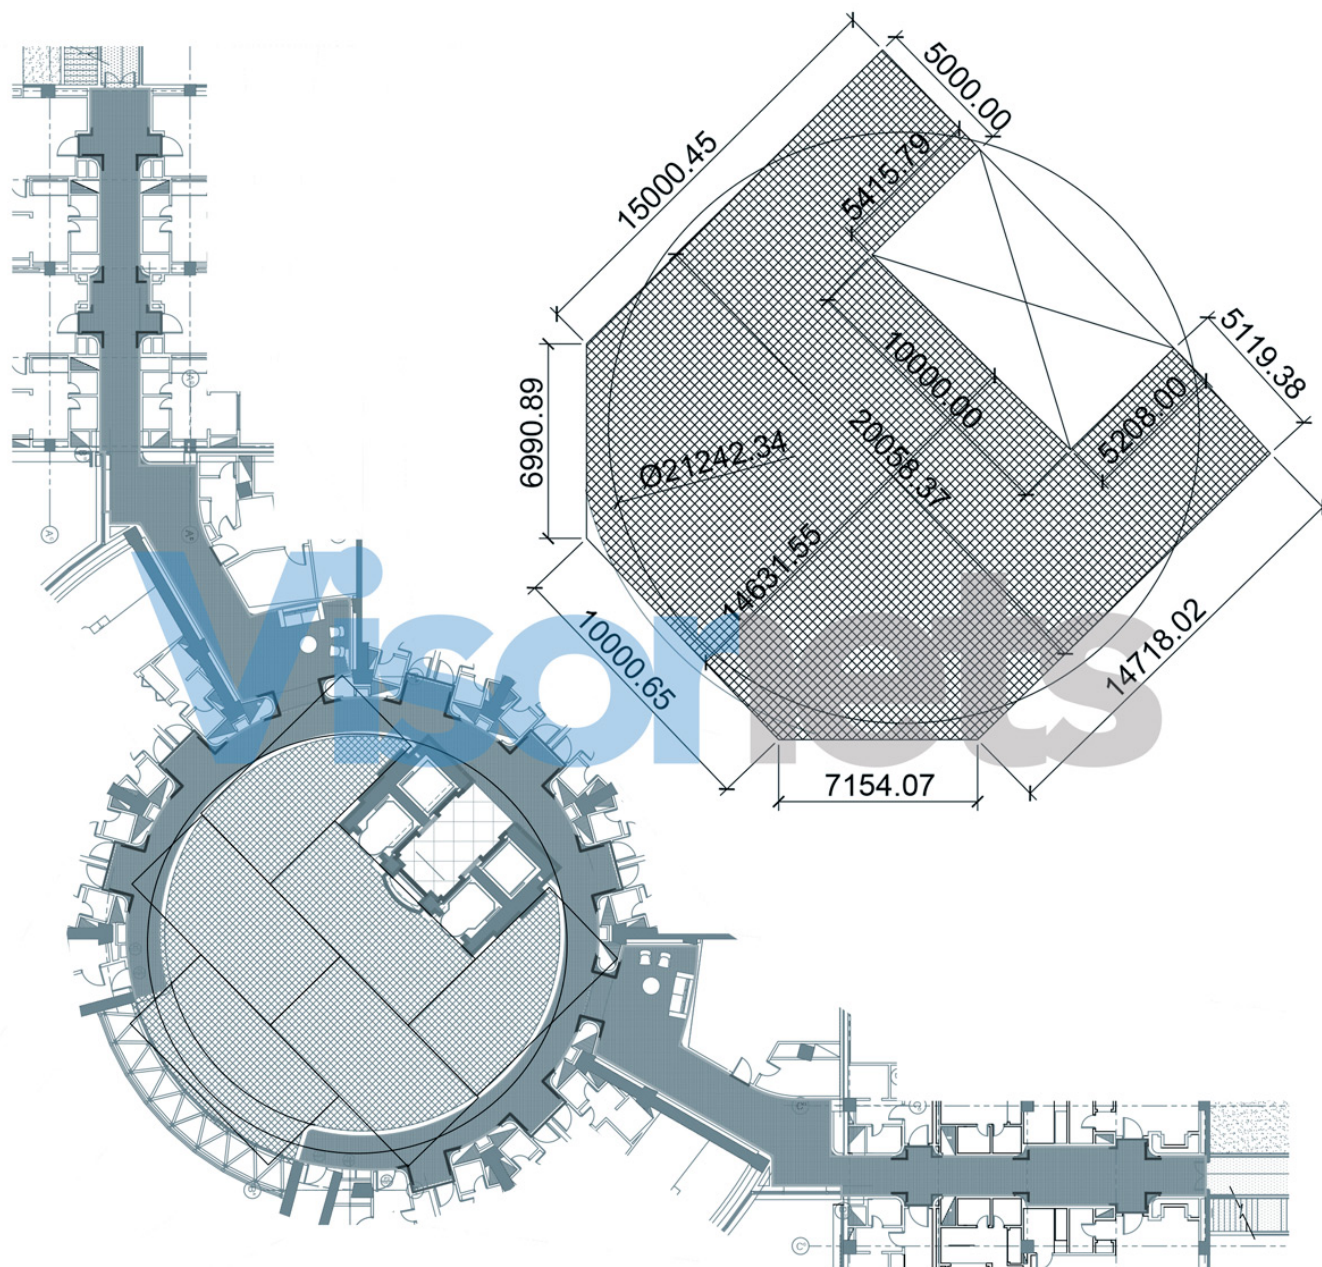

**Safety net Type S - Special shape**

## Safety Nets: Customized nets by costumer drawings

As a result our costumer gave us  
congratulations. They said: “The nets fix like  
a glove”.

**Safety net Type S - Special shape**
