Visornets was present on November 24 at the meeting organized annually by FASET (Fall Arrest Safety Equipment Training), and did so as a sponsor of one of the prizes awarded during the event held at Tewkesbury Place in Cardiff (The United Kingdom).

For Visornets, FASET is a benchmark, not only at the UK level, but also due to its international projection, as it is an association that looks after the interests of the safety nets industry, bringing together installation companies, contractors, manufacturers and companies training in the use of safety nets.

Our congratulations to the rest of the winners and to all the participants.

From Visornets we thank the organizers for the invitation, and especially Becky Clutton, Tony Seddon and Joe Black, from the event to this annual meeting and we encourage them to continue working to promote the importance of prevention and internal protection in work spaces of the construction sector.
